

## available material in china to manufacture

In China, there are multiple manufacturers offering materials suitable for the production of edible gold flakes for drinks like Goldwasser. The most commonly available material is **high-purity edible gold leaf**, usually ranging from **22K to 24K gold** (around 99% purity), which is certified safe for food use. Here's what's available:

- **Edible Gold Leaf Sheets:** These are thin, hammered sheets of pure gold (often 24K, sometimes 23K), typically sized around 80mm x 80mm (3.15 x 3.15 inches). They are manufactured to food-grade standards and are widely sourced for culinary use, including drinks and cake decoration.
- **Edible Gold Flakes and Powder:** Manufacturers also provide pre-cut edible gold flakes and edible gold powder, derived from these leaf sheets, for direct addition to beverages, desserts, and luxury foods.
- **Edible Silver Leaf/Flakes:** Food-grade silver leaf is also easily available for similar decorative and culinary purposes.

### Leading Suppliers in China include:

- Foshan Shunde Jinzi Foil Decoration Material Co., Ltd.
- Dongguan Jinsheng Gold Leaf Co., Ltd.
- Yongloong Craft Material (Nanjing) Co., Ltd.
- Various suppliers on [Alibaba.com](#) and [Made-in-China.com](#) platforms. <sup>[1] [2] [3] [4] [5] [6]</sup>

These materials are typically certified as food-grade (E175, for gold) and safe for human consumption when used as a decorative element in food and drink.
